K'Nex.com
“Hi! I’m your K’NEX Building Buddy. When you see me in the instructions, you’ll want to pay close attention to the details being pointed out.”

Ready, Set, Build
To begin your model, find the and follow the numbers. Each piece has its own shape and color. Just look at the picture, find the pieces in your set that match what you see, and snap them together. Try to hold your model in the same direction as in the picture so you’ll attach your pieces to the right place.

Movin’ On
The faded colors tell you this section is already built. You’ll want to connect the new section to the place where the arrows are pointing. These pieces will be in full color.

Spacers
There are places in your model where you need to add blue and silver Spacers. Be sure to count them carefully.

BUILDING TIPS:
• Try to face your model in the same direction as shown in the instructions.
• Some steps include pieces that require a strong “push” to snap together. You might want to ask an adult for help.

Connectors
There are silver Connectors with special long slots. They slide together as you see in the pictures. Push the parts together until you hear a “click”.

Flexi-rods
A Flexi-rod is a Rod that you bend to make curves. It will be easier to attach to your model if you bend it back and forth first.

FCC Statements:
This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
1. This device may not cause harmful interference and
2. This device must accept any interference received, including interference that may cause undesired operation. This model is tested to comply with FCC standards - FOR HOME OR OFFICE USE.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy, and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: (1) Reorient or relocate the receiving antenna. (2) Increase the separation between the equipment and receiver. (3) Consult the dealer or an experienced radio/TV technician.

This Class B digital apparatus complies with Canadian ICES-003.
Battery Information:

CAUTION: Do not use Sound Module close to ear! Misuse may cause damage to hearing.

CAUTION:
- Make sure batteries are inserted correctly and follow the toy and battery manufacturer’s instructions.
- Insert batteries with correct polarity (+/-) as shown.
- Do not mix different types of batteries; do not mix alkaline, standard (carbon-zinc), or rechargeable (nickel-cadmium) batteries. Do not mix new and used batteries. Only batteries of the same or equivalent type recommended should be used.
- Remove exhausted batteries from the toy; do not short circuit supply terminals.
- Remove all batteries if the toy is not used for a long period of time.
- Do not dispose of batteries in a fire; they could leak or explode and cause injury.

IMPORTANT TIPS:
- Alkaline batteries AAA (LRO3) are recommended.
- Rechargeable batteries are not recommended.
- Remove rechargeable batteries before recharging; they must be charged only under adult supervision.
- Non-rechargeable batteries must not be recharged.
- Keep components free of dust; do not immerse in water.

How to Insert and Remove Batteries

Use a small Philips Head screwdriver to loosen the screw, then remove the battery door. Insert 3 fresh AAA batteries (LRO3) into the compartment with the correct polarity (+/-) as shown here.

Sound doesn’t work? Check to see if you have fresh batteries and that they are installed properly.

Parts Checklist

Before you start building, be sure to compare the parts in your set with the parts listed below. If anything is missing, check out the back cover of this instructions booklet for how to contact us. We’re here to help!

Turn the throttle handle to start the motor; turn it again and it will rev up and shake.
Turn the throttle handle to start the motor; turn it again and it will rev up and shake.

- Toume la manette des gaz pour faire démarrer le moteur ; tourne-la encore une fois et le moteur rugit et vrombit.
- Gira la palanca del regulador para arrancar el motor; girala otra vez y el motor se va a acelerar y sacudir.
- Draai de gashendel om de motor te starten; draai hem nog een keer om te motor te laten brullen en schudden.
- Gira l’acceleratore sul manubrio per avviare il motore, poi giralo di nuovo e sentirai il tutto gas e la moto si scuotera.
- Roda o manípulo de aceleração para arrancar o motor; roda novamente e serão produzidas rotações e vibrações.
