Due to Earth's depleted resources, a squadron of elite pilots was sent to find a new energy source. Shadow, also known as J.J. Hawkins, is the youngest of the exploration team. He was chosen for the exploration team because of his superior computer skills. When his space cruiser passed through a magnetic storm, the ship crashed on the planet Zeilor. Upon regaining consciousness, J.J. Hawkins found his body had combined with the metal of the ship and attached to his new metallic body was a glowing PowerCore.

"J.J. Hawkins" became "Shadow".

Shadow's PowerCore gives him the ability to become invisible, enabling him to easily attack or escape from his enemies. Shadow's technical know-how and invisibility make him a valuable member of the elite pilots.
